

CLOUD JOURNAL REQUIREMENTS

- Use PowerPoint
- A minimum of ten entries
- Each entry must include
 - One photograph of clouds you took yourself
 - Description of the photograph (2-3 sentences)
 - Type(s) of cloud(s)
 - Location (two main cross streets)
 - Date and time

cumulus clouds at sunset

Cumberland & Touhy,
Skokie *Oct 14, 2016*

This cloud is a very large cumulus cloud tinted yellow and orange by the light of the setting sun. Even though this cloud is large it is not a rain cloud because it was not dark on the bottom and it is not very vertical.

Cirrus and cirrostratus

Montrose & Cicero,
Chicago *Dec 15, 2015*

These cirrus clouds are in long streams which makes them cirrostratus clouds. There are some cirrus clouds that are separated. In the background, in the distance, there is an altostratus cloud.

TO COMPLETE YOUR JOURNAL

- Add a title page
- Be sure to put your name on the title page
- Email the PowerPoint to jwalker@ccc.edu
- MAKE SURE THE FILE NAME OF YOUR CLOUD JOURNAL IS:
 - CloudJournal_YOURNAME
- Journals named incorrectly will not be accepted.

WHY A CLOUD JOURNAL?

The purpose of this assignment is to encourage you to look up at the sky. If you do this every day you will begin to notice the relationship between the clouds in the sky and the weather around you. You might also realize how beautiful clouds can be.

Have fun!!!

Seriously! This is your idea
to ACE the cloud
journal???
